Introduction

Under the General Data Protection Regulations (GDPR), individuals have a right to be informed about how the school uses any personal data that we hold about them. This report provides information on the kinds of personal data we hold as a school and why and how we might use it.

Schools use a variety of personal data as part of their work and we take great care to ensure that this information is kept safe and secure. Personal data includes things like names, addresses and age, information that we need in order to comply with our statutory role in educating pupils.

Most of this data is essential and does not require your consent to use it. Some personal data is not essential and for that, depending on age, we require the consent of either the pupil or parent. An example of the kind of data that needs consent would be using pupil photographs on the school website.

In this GDPR asset register you will find a complete list of all the systems the school uses which hold personal data. The report also contains additional information such as what personal data items are held, the legal basis for doing this, along with a description of the system and why the school processes the data.

If you have any queries about this document or any other issue relating to personal data, please contact the school Data Protection Officer, whose name is on the front of the pack.

Where is data stored?	Where customer data reaches our platforms, we store it exclusively on approved and compliant cloud infrastructure. We operate our products on Microsoft Azure Europe to ensure customer data is retained within the European Economic Area (EEA). The Microsoft Azure platform in Europe and the UK is rated "official" by the UK Government. We also use multiple protective layers within the Microsoft Azure platform to protect our services, including SQL and storage encryption, access rights management, service auditing, and firewalling. While Microsoft provides a secure platform through Azure, the security of our software is our own responsibility. Our product owners are all formally GDPR qualified and our design processes have security at their core. We routinely carry out vulnerability and penetration testing on our platforms and promptly address any issues identified. We store business data within selected cloud platforms, including services like Salesforce. Our usage of these platforms is subject to our approval of their information security practices. We also work with and store selected business data at our premises in London and where appropriate we hold frequent disaster recovery backup copies of our business data with suitably secure cloud services within the

	EEA. All transfers of customer data and business data use TLS 1.2 and/or AES encryption while being transferred. All of our computer devices are BitLocker encrypted to protect data in the event of theft.

Who is data shared with?	All Groupcall products include access controls to allow you to control what data is accessible to your own users. On occasions where it is necessary to access customer data on behalf of a school, for example to investigate a specific support case, only approved Groupcall support and technical staff can access it. Groupcall staff are vetted and are subject to contractual data access policies and confidentiality clauses. We carry out DBS checking where appropriate. In order to carry out business activities authorised Groupcall staff can access business data subject to access controls.

System used: IDL-Literacy and Numeracy	
Description	IDL was devised in the mid 1980s by educators working with the Starcross Educational Research Association. In 2012 a programme was funded by the Big Lottery called Lifting Barriers. This allowed IDL to be developed for use within a school environment in conjunction with SENCO leaders. Over a three year period IDL was placed in to 120 primary and secondary schools across the North West. IDL was required to show an increase in reading and spelling ages along with an increase in confidence and self-esteem for those pupils with dyslexia or dyslexic type difficulties. The results showed an average increase in reading and spelling ages of 11 months after only 26 hours use. Since its development for use in schools, IDL has gone from strength to strength with schools nationwide and overseas using IDL and demonstrating real improvements for pupils with challenging literacy needs.

System used: School Cloud	
Description	SchoolCloud started in a computing classroom — except, we weren't the teachers. Our company founders were aged 15 and challenged by their IT teacher to solve a school-wide issue of room double bookings. They spent a rainy, Scottish summer developing our very first product, Room Booking System. Not only did their school find it a winning solution, but they even gave them the grand sum of £100 for it! Equipped with our first income and some valuable guidance from entrepreneurial parents, we launched our business from the playground in 2006. And we've not looked back since. Today, by understanding our customers to ensure our technology is tailored to their needs, our software has come far beyond version one. We've organically grown our team to develop and launch multiple award-winning technology solutions that are used across the world to enhance school operations.
