## Introduction

Under the General Data Protection Regulations (GDPR), individuals have a right to be informed about how the school uses any personal data that we hold about them. This report provides information on the kinds of personal data we hold as a school and why and how we might use it.

Schools use a variety of personal data as part of their work and we take great care to ensure that this information is kept safe and secure. Personal data includes things like names, addresses and age, information that we need in order to comply with our statutory role in educating pupils.

Most of this data is essential and does not require your consent to use it. Some personal data is not essential and for that, depending on age, we require the consent of either the pupil or parent. An example of the kind of data that needs consent would be using pupil photographs on the school website.

In this GDPR Privacy Notice summary report, you will find a complete list of all the systems the school uses which hold personal data. The report also contains additional information such as what personal data items are held, the legal basis for doing this, along with a description of the system, why the school processes the data and who it is shared with.

If you have any queries about this document or any other issue relating to personal data, please contact the school Data Protection Officer, whose name is on the front of the pack.

Eedi	<p>Hundreds of millions of children are affected by a lack of personalisation in education, limiting their ability to learn and excel. Teachers are a stretched resource and there are growing shortages worldwide. Technology has so far failed to deliver and a growing private tuition market only serves to drive home the shortcomings of mainstream systems widening the gap between those who can and cannot afford it. The critical factors that determine a child's success and their desire to learn, occur in their early years. Pitted</p>	

	<p>against these impossible odds, many lose confidence and fail to achieve their potential. So, we've made it our mission to help every child build the skills and confidence to thrive in a rapidly changing world. We believe that using smart content, the right amount of technology, and expert-human guidance, we can create learning pathways tailored to the needs of any child. We help children to learn, want to learn more and reveal what they need to learn and when. Already, more than 250,000 teachers in 16,000 schools have used our content, helping millions of children around the world. But it's not just the numbers that matter, it's also about who's using it. We want to help every child, regardless of their social, cultural or economic status. Each child has extraordinary potential, and by providing parents and children the unique insights and personalised instruction to take control of their learning, we can help every child shine.</p>

<b>Description</b>	Hundreds of millions of children are affected by a lack of personalisation in education, limiting their ability to learn and excel. Teachers are a stretched resource and there are growing shortages worldwide. Technology has so far failed to deliver and a growing private tuition market only serves to drive home the shortcomings of mainstream systems widening the gap between those who can and cannot afford it. The critical factors that determine a child's success and their desire to learn, occur in their early years. Pitted against these impossible odds, many lose confidence and fail to achieve their potential. So, we've made it our mission to help every child build the skills and confidence to thrive in a rapidly changing world. We believe that using smart content, the right amount of technology, and expert-human guidance, we can create learning pathways tailored to the needs of any child. We help children to

	learn, want to learn more and reveal what they need to learn and when. Already, more than 250,000 teachers in 16,000 schools have used our content, helping millions of children around the world. But it's not just the numbers that matter, it's also about who's using it. We want to help every child, regardless of their social, cultural or economic status. Each child has extraordinary potential, and by providing parents and children the unique insights and personalised instruction to take control of their learning, we can help every child shine.

<b>System used: School Cloud</b>	
<b>Owner</b>	Prudhoe Community High
<b>Description</b>	SchoolCloud started in a computing classroom — except, we weren't the teachers. Our company founders were aged 15 and challenged by their IT teacher to solve a school-wide issue of room double bookings. They spent a rainy, Scottish summer developing our very first product, Room Booking System. Not only did their school find it a winning solution, but they even gave them the grand sum of £100 for it! Equipped with our first income and some valuable guidance from entrepreneurial parents, we launched our business from the playground in 2006. And we've not looked back since. Today, by understanding our customers to ensure our

	technology is tailored to their needs, our software has come far beyond version one. We've organically grown our team to develop and launch multiple award-winning technology solutions that are used across the world to enhance school operations.
